Figure 1 shows various map symbols and their corresponding text labels. The symbols are arranged in a grid-like fashion. The first column contains symbols for different types of roads: a solid line for 'Highway', a dashed line for 'Secondary Road', a dotted line for 'Jeep Trail/Walkway/Path', and a line with cross-ticks for 'Railroad'. The second column contains symbols for different types of boundaries and features: a line with cross-ticks for 'Pipe/Power Line', a line with small triangles for 'Ridge/Physical Feature', a line with small squares for 'Property/Fence Line', and a dashed line for 'Nonvisible Boundary'. The third column contains symbols for different types of water bodies: a blue line for 'Stream/Shoreline', a blue line with wavy dashes for 'Intermittent Stream', a blue area for 'River / Lake', and a blue area with wavy lines for 'Glacier'. The text labels are: ':Modality:' (a blue box with white text), 'Inset' (a grey box with white text), and 'Out Area' (a white box with grey text).

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

- 1 A "+" following a place name indicates that the place is coextensive with a MCD. A "-" indicates that the place is also a false MCD; the false MCD name is not shown.
- 2 This map shows tribal census tract boundaries and numbers within the subject entity. nontribal census tract boundaries are shown outside of the subject entity. Without numbers, the tribal census tract is a type of census tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian household. A tribal census tract is a type of census tract that is located on off-reservation trust lands cross state or county boundaries, the same tribal census tract number may be assigned on both sides of the boundary, and, if so, constitutes a single tribal census tract.
- 3 A "+" following a block number indicates that the block number is repeated elsewhere in the block.
